PROGRESS TOWARDS FEDERATED LOGISTICS THROUGH THE INTEGRATION OF TEN-T INTO A GLOBAL TRADE NETWORK

Accelerating the collaborative transition towards the Physical Internet in the context of the new emerging trade routes

This project is funded from the European Union's Horizon 2020 research and innovation programme under grant agreement No 860274. The views expressed by the PLANET Consortium do not necessarily represent the views of the EU Commission/INEA. The Consortium and the EU Commission/INEA are not responsible for any use that may be made of the information it contains.

THE PROJECT

PLANET aims at boosting the EU's leadership in global logistics flows by effectively interconnecting infrastructure with cost considerations, geopolitical developments, as well as current and emerging transport modes and technological solutions, enabling an EU-Global network that ensures equitable inclusivity of all participants, increase the prosperity of nations, preserve the environment and enhance Citizens quality of life.

The realization of this vision in PLANET is branded as the **EGTN** (Integrated Green EU-Global T&L Network).

Physical Internet concepts in combination with disruptive technologies such as IoT, Blockchain, 5G, autonomous vehicles and hyperloop will be utilized by PLANET to move towards more optimal and efficient transport and logistics.

OBJECTIVES

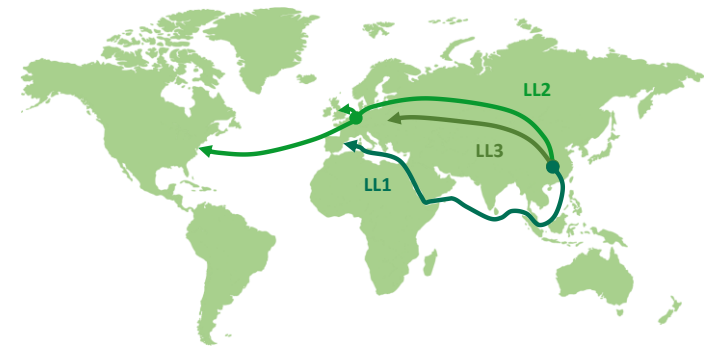

1. Generate a **Simulation Capability** for the assessment of the expected impact of new trade routes, national strategies and innovations on the TEN-T corridors and European logistics operations.
2. Built an **Open cloud-based ICT Infrastructure** facilitating the implementation of EGTNs.
3. Employ **3 Living Labs** to facilitate experimentation and testbeds for project's solutions.
4. Formalize an **EU Roadmap** along with a **Capacity Building** effort purposed to accelerate EGTN realisation, closely aligned with prominent T&L blockchain initiatives and the ALICE Physical Internet working groups.
5. Ensure wide **Dissemination** supported by a **clear Commercialisation Strategy and Policy recommendations**.

WPs AND LIVING LABS

The project is evolving mainly through **6 work packages** (WPs):

The approach is being tested in **three** different **Living Labs** (LL):

LL1: PI and Blockchain for optimised door-to-door Asia-Europe corridors – Mediterranean Corridor

LL2: **Synchromodal dynamic management of TEN-T & Intercontinental flows promoting rail transport**

LL3: **IoT for Silk Road Route – reliable, transparent and fully connected corridor from China to the EU**

 Duration: 3 years
01/06/2020 – 1/05/2023
